
The DX Bulletin

ISSUE 110 OCTOBER 3, 1981

PROPAGATION: Oct 2, High/Low Normal; Oct 3, High Normal; Oct 4,5, Above Normal; Oct 6, High Normal; Oct 7, High/Low Normal; Oct 8, 9, Low Normal; Oct 10, High Normal; Oct 11, High/Above Normal; Oct 12, 13, 14, Above Normal; Oct 15, Above/High Normal; Oct 16, High/Low Normal; Oct 17, High/Above Normal. TNX N4XX.

1A0KM TO COUNT JAN 1, 1982

The Awards Committee at ARRL Headquarters has approved DXCC country status for the Sovereign Military Order of Malta, and cards will be accepted starting January 1, 1982. Do not submit 1A0KM QSLs for credit until after that date.

The Awards Committee voted on a recommendation by the volunteer DX Advisory Committee made several months ago. Details appeared in TDXB Issue 67 (a brief note), Issue 79 (a letter from K3ZJ making the case for DXCC status) and Issue 101 (reporting the DXAC vote). Sources indicate that the vote within the Headquarters was very close on the issue. This will make the current (after Jan 1) Countries total 319 again; it had been at 318 since Okino Torishima was deleted last December.

CROZET

FB8WG is on the air from Crozet sooner than expected, perhaps since he has taken a Drake TR-4 instead of the originally planned Heathkit. At this time operator George, F2CL, does not have a remote vfo for his TR-4 (nor RIT, of course), and he is using the island's rhombic antenna, which is aimed at France. A Drake remote vfo is reportedly on the way to Crozet, along with a trap vertical.

FB8WG has thus far been reported only on a 21170 French net at around 1900Z. He does not like pileups and various do-gooders are already trying to line up "lists" for him. He will be on the island for probably about one year.

LU3ZY South Sandwich

On again last week for the first time in months was Carlos, LU2EEO, operating LU3ZY. He is reportedly scheduled to leave the island in November. Not a DXer, Carlos's operations have been almost exclusively "lists" on SSB; two years ago LU3ZY was active and very workable on 10 Meter CW. The station was not on 10 last season but many are hoping for some activity on 28 MHz CW this time. For now, best bet for looking is 14220 0000Z.

BURMA

Neither XZ5A nor XZ9A count (or are expected to count) for DXCC, but some are now reporting working two different XZ1 stations reportedly from Rangoon. No particulars.

SAN FELIX

Our best source (namely, the factory which loaned radios) indicates that the WB1GDQ/CE0 operations from Juan Fernandez and San Felix have again been postponed a month, until the end of October. If this is so, the Juan Fernandez stop might be scuttled. It would still pay to watch at this time but a better bet is wait a month.

NEW ENGLAND DXCC ANNUAL BANQUET

This event will be held Oct 10, with the free afternoon session at 2 pm and an evening banquet session at 6:30 pm (18 bucks per person). Banquet speaker is Dr Vince Thompson, K5VT. Show up at the Waltham, MA Holiday Inn, Totten Pond Road at Rte 128. No other info available.

TDXB: 203-871-6251

The DX Bulletin (ISSN 0279-8077) is published weekly for \$26 per year in the U.S., Canada and Mexico; all others \$35 per year. The *DX Bulletin* is published at 306 Vernon Ave., Vernon, CT 06066 Second-class postage paid at Vernon. CT. POSTMASTER: Send address changes to *The DX Bulletin*, 306 Vernon Ave., Vernon, CT 06066

One of our Japanese friends has reported a number of JA stations worked a "JF1IST/VS9K" on Sept 2, who was active for about an hour and a half on 15 Meters. No other information available.

Another letter from Japan about that quick Andamans operation last month... VU2JPN, who was with the Japanese embassy in New Delhi, is expected to be stationed in Washington D.C. momentarily, and says he will be visiting Newington to let the DXCC folks see his operating permission for VU7 Andamans. He operated from a hotel there, alone. He used an FT-101 and a mobile whip antenna on the balcony. VU2WTR, another Japanese official in India, was not on the operation, but he is the QSL manager for VU7AN. There is no indication of just how many QSOs were made on the 2-day operation.

Last week it was mentioned that HS5ANI said Thai amateurs were only off the air temporarily last month while the government registered their equipment. But a note from HS1AMX (who is Swiss) says "amateur radio has been forbidden since Aug 18" with all operations being illegal. He held little hope in his Sep 22 letter for any quick remedy to the situation. Yet, HS stations are now active. ???

IV3OSH/5R8 was still active through Sep 29, which was said to be his "last day" there. This appears to have been legitimate, if documentation holds up for DXCC.

Those V3A stations are new callsigns for Belize (formerly VP1); VP2A Antigua stations are expecting to be V2A soon.

Last Sunday's (Sep 27) "Chasing DX" on Radio Moscow (15540, 1300Z) wasn't as hammy as the week before, but not bad. Maybe we should send them TDXB. They were only about 30 dB over S9 in CT, but were coming in both long and short path simultaneously. It's a well-known fact that enough power enables one to create one's own ionosphere. Just ask...(oh, never mind).

TDXB note: we expect to announce next week a new arrangement for providing QSL information in the Bulletin. It will be much more comprehensive than info we have been able to publish thus far. Stand by.

CORRECTIONS TO QSL LIST IN ISSUE 108: All SV0AA QSLs, portable operations or otherwise, go to N200. W4MAT/SV goes to W4MAT c/b address.

Latest issue of CQ magazine has a very interesting "DXer's Aptitude Quiz" by Larry Brockman, N6AR. Your radio store has copies. October 73 Magazine has a number of DX-related articles, including a 6-page interview with K10X on his antenna farm, WB8BTH's story of a VP5 operation, a AK0Q propagation article, and even Dave Mann, K2AGZ, whose column normally does not touch on DXing, spends considerable words on the Burma DXCC question. Finally, there's a nice interview with Iris and Lloyd Colvin (W6QL and W6KG).

Turkish hams are advising they have hopes of being legal again next year, for the first time in decades. Presently, authorities look the other way and the hams who are on maintain very low profiles.

Kirsti, VK9NL, and hubby Jim Smith, VK9NS, made 6,000 contacts during their 5W1DG/DK operations early in Sep. Kirsti worked 1500 CW contacts with a straight key!

Another week or so of equinox conditions remain for those who watch sunset and sunrise times...try 20 Meters around sunset from the East Coast to Asia, pointing your aerial 90-120 degrees to work 9V1, etc.

JW7XB says he and a few others will be on from Jan Mayen for the CQ Phone contest the last weekend of this month, signing JX8A. JX5NM will be along and will work CW the day before and after the 'test.

KP4BZ and friends intended B.V.I. operation for the 'CQ Phone, but in order to avoid the N6CW effort they have switched to Montserrat for that weekend. It will be a multi-single effort. And XE2AQ will lead a Radio Club of Nuevo Leon group in a multi-single setup, signing 4A2Q.

Yaesu's new FT-1 transceiver, pictured in Oct QST, will be priced around \$3,000. Signal One will unveil a new CX-12 shortly, featuring an Ulrich Rhode receiver front end and a price reduction from the CX-11 which it supercedes! Collins has moved their KWM-380 service facilities from El Paso to Cedar Rapids, and the radios will be made in Salt Lake City.

 stickers to fill seven requests on
 file. Help!

BOOK REVIEW

One of the locals reports having a
 "run" of Europeans broken into by Cocos
 Island, VK9NYG, the other morning. 28600
 at 1300Z. Frank is often there and he
 prefers calling you. Comes in over the
 North Pole. Bob Polhamus, KB9UV, who
 was WA9WWT in a former life and manages
 QSLs for VK9YA and VK9YB, says the is-
 land will be crowded with hams this fall
 and winter. Bob says Australia is get-
 ting Cocos ready for use as a "quarantine
 station" (whatever that means) and that
 a JET tribander will be added to VK9NYG's
 station (which is the one visitors use).

ELWFO leaves shortly for a one year
 stay on Chatham Island.

ZL3AFH/Auckland Is. is still off the
 air (two months now) with sour final
 amplifier transistors. He used to be
 fairly regular on 14320 at 1000Z.

New Twin City DX Association (St.
 Paul and Minneapolis MN) officers are
 W1JL, KRØC, and WØYDB. 1, 2, and 3.

Operators at W6VIO a few weeks ago
 made over 11K contacts on seven bands,
 from the Jet Propulsion Labs during the
 Saturn flyby of Voyager II.

This issue has been entirely too tame
 and we wouldn't want to spoil our repu-
 tation. The latest issue of Worldradio re-
 viewed a book called "The Complete Idiot's
 Guide to DX" by Stuart Gregg, NF4Z (pub-
 lished by Bash Educational Services, Inc.).
 Bash also publishes the controversial "Final
 Exam" series.

Feeling bad that we didn't get a com-
 plimentary copy, we rushed out and plunked
 down thirteen dollars for a copy. It would
 be a rip-off at thirteen cents. The "book"
 is only 130 pages long, sadly outdated in
 its material, poorly edited, and more. It
 would be a great exercise for your kids...
 have them play "Find the Grammatical
 Errors" with this thing and they will be
 occupied for hours, maybe days.

TDXB will give this thing to the first
 person to send a dollar for postage. We
 will deduct it from our taxes as a com-
 plete loss.

Can you name someone who has a callsign
 with a four-letter suffix? Answer p. 3.

Maybe they meant you would be a
 complete idiot to buy the book!
